

CONTENTS

FOREWORD	7
LIST OF TABLES, LIST OF FIGURES, LIST OF MAPS	13
LIST OF SELECTED SYMBOLS AND ABBREVIATIONS	16
INTRODUCTION	19
I. HYDROLOGICAL ASSESSMENT OF 2015	21
I.1 Climate characteristics of the year	21
I.1.1 Temperature and precipitation conditions	21
I.1.2 Storage of water in snow cover	21
I.2 Surface waters	27
I.2.1 Runoff situation during the year	27
I.2.2 Assessment of low-flow events	27
I.2.3 Assessment of flood events	29
I.2.4 Assessment of water balance in water management reservoirs	31
I.3 Groundwaters	59
I.3.1 Shallow boreholes	59
I.3.2 Springs	59
I.3.3 Deep boreholes	59
II. HYDROLOGICAL BALANCE – WATER QUANTITY ASSESSMENT	72
II.1 Introduction	72
II.2 Overall assessment of water balance	73
II.3 Assessment of water balance results in river basin districts	74
II.3.1 Upper and middle Labe river basin district	74
II.3.2 Upper Vltava river basin district	77
II.3.3 Berounka river basin district	79
II.3.4 Lower Vltava river basin district	81
II.3.5 Ohře, Lower Labe and other tributaries of the Labe river basin district	83
II.3.6 Upper Odra river basin district	85
II.3.7 Morava and tributaries of the Váh river basin district	87
II.3.8 Dyje river basin district	89
II.4 Assessment of water balance results in balance districts	92
III. HYDROLOGICAL BALANCE – WATER QUALITY ASSESSMENT	105
III.1 Introduction	105
III.2 Overall assessment of water quality	107
III.3 Assessment of water quality results in river basin districts	112
III.3.1 Upper and middle Labe river basin district	112
III.3.2 Upper Vltava river basin district	113
III.3.3 Berounka river basin district	114
III.3.4 Lower Vltava river basin district	116
III.3.5 Ohře, Lower Labe and other tributaries of the Labe river basin district	117
III.3.6 Upper Odra river basin district	119
III.3.7 Lužická Nisa and other tributaries of the Odra river basin district	120
III.3.8 Morava and tributaries of the Váh river basin district	121
III.3.9 Dyje river basin district	123
III.3.10 Other tributaries of the Dunaj river basin district	124
III.4 Water temperature	125
IV. PROCESSING OF DATA AND ITS PUBLICATION	153

IV.1	Real-time information.....	153
IV.2	Regime information.....	155
IV.2.1	Surface water quantitative data.....	155
IV.2.2	Groundwater quantitative data.....	156
IV.2.3	Surface water and groundwater qualitative data.....	156
IV.2.4	Information about the activity of experimental basins.....	157
IV.3	Use of real-time and regime information.....	157
V.	TOPICAL AND REGIONAL HYDROLOGICAL PROBLEMS AND TASKS ...	159
V.1	Assessment of hydrological drought in 2015.....	159
V.1.1	Meteorological causes of drought.....	159
V.1.2	Surface waters.....	161
V.1.3	Groundwaters.....	166
V.1.4	Summary.....	173
V.2	Influence of selected reservoirs on low flows during the hydrological drought in 2015.....	174
V.2.1	Introduction.....	174
V.2.2	Computation of mean daily discharges without the influence of increase of discharge by reservoirs.....	174
V.2.3	Conclusion.....	177
V.3	The representativeness of gauging stations for the measurement and evaluation of low flows.....	178
V.3.1	Introduction.....	178
V.3.2	Uncertainties during the evaluation of low flows and their possible reduction or elimination.....	178
V.3.3	Evaluation of the stability and sensitivity of river gauging sites.....	178
V.3.4	Conclusion.....	179
VI.	REFERENCES OF PUBLISHED WORKS IN 2015.....	182
	APPENDICES.....	190
PI.	OVERVIEW OF HYDROLOGICAL OBSERVATIONS IN 2015.....	191
PI.1	Initial remarks and explanations.....	191
PI.2	Hydrological ordering of the main river basins and CHMI Branch Offices responsibility.....	196
PI.3	Hydrogeological regions.....	199
PI.4	Monitoring sites and gauging profiles.....	202
PII.	OVERVIEW OF THE CHMI HYDROLOGICAL OFFICES.....	203

CONTENTS OF THE INTERNET VERSION OF THE YEARBOOK

Complete printed version of Hydrological Yearbook of the Czech Republic 2015

Map presentation of objects

List of papers published in the Chapter V. in the volumes 1994–2014

Compilation of the hydrological water quantity balance

Tables, figures and maps published on the Internet only

List of monitoring sites and profiles

PI.4.1W	Surface water gauging stations
PI.4.2W	Surface water quality monitoring profiles
PI.4.3W	Monitoring sites for spring yields and their water quality
PI.4.4W	Boreholes for monitoring of groundwater levels and quality
