

CONTENTS

FOREWORD	7
LIST OF TABLES, LIST OF FIGURES, LIST OF MAPS	13
LIST OF SELECTED SYMBOLS AND ABBREVIATIONS	15
INTRODUCTION	19
I. HYDROLOGICAL ASSESSMENT OF 2016	21
I.1 Climate characteristics of the year	21
I.1.1 Temperature and precipitation conditions	21
I.1.2 Storage of water in snow cover	21
I.2 Surface waters	28
I. 2.1 Runoff situation during the year	28
I. 2.2 Assessment of low-flow events	30
I.2.3 Assessment of flood events	30
I.2.4 Assessment of water balance in water management reservoirs	32
I.3 Groundwaters	62
I.3.1 Shallow boreholes	62
I.3.2 Springs	63
I.3.3 Deep boreholes	63
I.3.4 Base flow	63
II. HYDROLOGICAL BALANCE – WATER QUANTITY ASSESSMENT	75
II.1 Introduction	75
II.2 Overall assessment of water balance	76
II.3 Assessment of water balance results in river basin districts	78
II.3.1 Upper and middle Labe river basin district	78
II.3.2 Upper Vltava river basin district	80
II.3.3 Berounka river basin district	83
II.3.4 Lower Vltava river basin district	85
II.3.5 Ohře, Lower Labe and other tributaries of the Labe river basin district	87
II.3.6 Upper Odra river basin district	89
II.3.7 Morava and tributaries of the Váh river basin district	92
II.3.8 Dyje river basin district	94
II.4 Assessment of water balance results in balance districts	97
III. HYDROLOGICAL BALANCE – WATER QUALITY ASSESSMENT	110
III.1 Introduction	110
III.2 Overall assessment of water quality	112
III.3 Assessment of water quality results in river basin districts	116
III.3.1 Upper and middle Labe river basin district	116
III.3.2 Upper Vltava river basin district	118
III.3.3 Berounka river basin district	119
III.3.4 Lower Vltava river basin district	121
III.3.5 Ohře, Lower Labe and other tributaries of the Labe river basin district	122
III.3.6 Upper Odra river basin district	125
III.3.7 Lužická Nisa and other tributaries of the Odra river basin district	126
III.3.8 Morava and tributaries of the Váh river basin district	127
III.3.9 Dyje river basin district	129
III.3.10 Other tributaries of the Dunaj river basin district	131
III.4 Water temperature	131

IV. PROCESSING OF DATA AND ITS PUBLICATION	158
IV.1 Real-time information	158
IV.1.1 Information on the websites	159
IV.2 Regime information	160
IV.2.1 Surface water quantitative data	161
IV.2.2 Groundwater quantitative data	161
IV.2.3 Surface water and groundwater qualitative data	161
IV.2.4 Information about the activity in experimental basins	161
IV.2.5 Information on the websites	161
IV.2.6 Specification of orders for hydrological data	162
IV.3 Use of real-time and regime information	162
V. TOPICAL AND REGIONAL HYDROLOGICAL PROBLEMS AND TASKS ...	164
V.1 Josef Hladný in Czech hydrology	164
V.1.1 Introduction	164
V.1.2 Biography of Josef Hladný	164
V.1.3 Josef Hladný's patrimony	166
V.1.4 Conclusion	168
V.2 Presentation of hydrological instruments for measuring in open channels	169
V.2.1 Introduction	169
V.2.2 Dilution method	169
V.2.3 Instruments using the velocity area method	169
V.2.4 Conclusion	172
V.3 Assessment of hydrological conditions during the period 2014–2016	173
V.3.1 Introduction	173
V.3.2 Chronological description of the hydrological condition development	173
V.3.3 Assessment of the period 2014–2016 from the hydrological drought perspective	174
V.3.4 Mean discharge in the period 2014–2016 relative to the long-term observation	174
V.3.5 Conclusion	177
VI. REFERENCES OF PUBLISHED WORKS IN 2016	178

APPENDICES	183
-------------------------	-----

PI. OVERVIEW OF HYDROLOGICAL OBSERVATIONS IN 2016	184
PI.1 Initial remarks and explanations	184
PI.2 Hydrological ordering of the main river basins and CHMI Branch Offices responsibility	188
PI.3 Hydrogeological regions	191
PI.4 Monitoring sites and gauging profiles	194
PII. OVERVIEW OF THE CHMI HYDROLOGICAL OFFICES	195

CONTENTS OF THE ELECTRONIC VERSION OF THE YEARBOOK

Complete printed version of Hydrological Yearbook of the Czech Republic 2016

Map presentation of objects

List of papers published in the Chapter V. in the volumes 1994–2015

Tables, figures and maps published in electronic version only

List of monitoring sites and profiles

PI.4.1E	Surface water gauging stations
PI.4.2E	Surface water quality monitoring profiles
PI.4.3E	Monitoring sites for spring yields and their water quality
PI.4.4E	Boreholes for monitoring of groundwater levels and quality
